

## Request for NO U TURN on SR 30 (US 98) at Tiger Point Blvd

TPVHOA,

The District Traffic Operations office has completed the research and review for your request for a U-turn prohibition for SR 30 (US 98/Gulf Breeze Parkway) at Tiger Point Boulevard (west entrance). In regards to your request for a traffic signal, this study is in the final review phase and you will receive a separate response from Mr. Heath Henderson, P.E., with Traffic Operations studies section. Thank you for the opportunity to provide assistance.

The Department conducted an on-site review of the area on June 25, 2011. Additionally, we requested that the Safety Department perform a safety review of the documented crashes. The Safety Department's review indicated that for a period beginning January 1, 2008 and ending April 25, 2011 there were three (3) documented crashes, none of which were related to the U Turn maneuver. Upon observation and evaluation of the subject location our findings are that this is a full median opening with sufficient width to conduct the U Turn maneuver.

Considering all relevant results, the Department does not recommend the installation of "NO U TURN" signage at the median opening for SR 30 (US 98) at Tiger Point Boulevard. However, we will continue to monitor this location in the future. Be assured the Department of Transportation will continue to place a high priority on the safety of the traveling public.

Respectfully,

Tammy Melchi
